## NEWS RELEASE

Thursday, January 25, 2018

Already in 2018, the Norfolk Police Division has taken eight reports of counterfeit money being passed in Norfolk. The denominations include \$10, \$20, and \$50 bills. While some are attempts to replicate actual currency, some bills are readily identifiable as fake. These bills actually say “COPY” and others have the incorrect president’s name on them. Some bills are what is termed “Motion Picture Money.” These bills mostly look like actual currency but plainly identify it as not actual currency and only for use in motion pictures. The US Currency Education Program identifies security features on each denomination of actual bills. They can be found here: <https://www.uscurrency.gov/denominations>

Below are some examples of these bills.
